

Dear All,

The mid semester examination of CRE II will be on topics discussed until the lecture of 11.09.2026. The following materials are part of the syllabus

- Chapters 7 and 8 of J.M. Smith for Module 1
- Chapter 10 (until section 10.4.4) of H.S. Fogler for Module 2
- Chapter 18 (until section 18.3) of O. Levenspiel for Module 3. You may also refer to Chapter 15 (until section 15.3.1) of H.S. Fogler for additional explanation.
- Tutorials 1, 2 and 3
- Class Notes until 11.09.2026

For Module 3, although you may not focus on the solution of the differential equation for the determination of the concentration profile inside the porous catalyst, the formulation of the problem, the concepts of the effectiveness factor (η) and Thiele modulus (Φ) should be known.

All the best,

Sangram
